ESCURA F2D

Porcelain tableware with innovative rustic colour combinations

ESCURA is the first collection of the brand F2D (Fine-to-Dine). The products of F2D provide the market with the latest trends in shapes, colours and materials.

The surprising element of the ESCURA range lies within its unique material combination. Rustic colour combinations were applied to porcelain, instead of stoneware which was previously the only possibility.

By using durable porcelain the products are extremely strong, which gives users a huge advantage in durability. The entire collection consists of different shapes of plates, cups and saucers, many different bowls, serving boards... Every single piece with its own unique rustic touch.
